BASIC MEDICAL SCIENCES FOR MRCP PART 1 (PT. 1) BY PHILIPPA J. EASTERBROOK PDF

Recognition of the importance of the basic sciences in medicine has led to a growing emphasis on such questions in both the MRCP part 1 and 2 examinations. This book was written in response to the need for a revision guide of the core basic sciences, namely genetics, microbiology, immunology, anatomy, physiology, biochemistry, statistics, and epidemiology. In this second edition the immunology and genetics chapters have been updated along with a section on molecular medicine.

Comprehensive but poorly proofread

By Erich Heinzle

It provides a fairly comprehensive summary of all of the basic foundations of general medicine relevant for a physician trainee in a very compact format.

However, proof reading left a lot to be desired. At first I assumed some dyslexia on the part of the proof reader(s), APPT instead of APTT, but then some fundamental factual errors were noted.

Nowhere was this more apparent than in the epidemiology chapter. Multiple errors appeared on some pages, such as degrees of freedom in the denominator for standard deviation, basic definitions of numbers needed to treat, and definitions of positive predictive value.

At least looking out for the typos will keep you awake!!

No other choice!

By Khalid Al-Bagdady

Useful BUT be careful when reading it, there are some mistakes (printing ones) some of which are fatal! it should be better revised.
