Surprisingly good book

By Amazon Customer

I recently switched from Nikon to Canon. I do portraiture and weddings for pay, amateur work for my church and a little family stuff. I made the switch to Canon because it was time to upgrade from my D300 and I liked the Canon 5d III better than the Nikon D800. I am pretty familiar with DSLRs. The 5d is my fourth purchase but I bought the Lowrie Field Guide to the 5d just to make sure I wasn't missing anything. Lowrie did a nice job with her book and she recommended the Corsentino guide for the EX 600-RT flash. I took her advice since I had found the Canon Manual ponderous and I couldn't find anything of value to understand the capability of the ST-E3-RT.

The Corsentino Guide was just what I needed. Straight easy to understand and lots of explanatory pictures. His detail on the ST-E3-RT sold me on getting one which I ordered that day from Amazon.

I am very familiar with the Nikon flash system on and off camera. Corsentino's book takes the Canon system from A to Z which means there was a lot of redundancy from my point of view but his approach and writing style was excellent, enough so that I read the book cover to cover even though it covered things with which I was already very familiar.

Bare Bones But Better Than the Manuals

By NCN

... and also up to date. "Light", as it were, on theory. Pretty much doesn't stray from the authors hard-one preferences. Not the full-on photographic course you get from the "Speedlites Handbook".

Not what I thought it was going to cover

By Chris

The book concentrates on limited use of Canon speedlights, and focuses a large part of the book on other additional external lighting set-ups.

I wanted a guide to cover getting the most from bounce lighting - hardly anything on the subject. And how to use the controls on my Cannon 430EX. But it did not cover much at all.

Very disappointed.
