# ENZYMES FOR AUTISM AND OTHER NEUROLOGICAL CONDITIONS BY KAREN DEFELICE PDF

Enzyme therapy is one of the fastest emerging successful alternatives for people on the autism spectrum as well as other neurological conditions. Reports of significant improvement in health, pain reduction, language, food tolerance, socializing and other benefits emerge daily. Drawing on long-standing scientific research and trials by a wide range of families, Karen DeFelice deals comprehensively with all the information on enzymes that parents or those new to enzymes need: how enzymes work, who may benefit, what to expect, practical tested advice on selecting and introducing the right kind of enzymes, and how this can be combined with other approaches and therapies.

I am so excited about this book!

By CagyRights

My daughter has been on a GFCF diet for four years and is now mainstreamed and in Kindergarten. You would have no idea she was diagnosed on the spectrum when she was three. I hated taking her to parties because there was never any food she could have. This book has been revolutionary for us. We can now deviate from the diet! She loves string cheese and soft bread. She is still on the diet at school but we can allow for deviations at home, and no negative effects so far! Very helpful information on how, when and what type of enzymes to take, how much, how long they last, dealing with the school, etc. I am so glad for this book!
