ISLAM DISMANTLED: THE MENTAL ILLNESS OF PROPHET MUHAMMAD BY SUJIT DAS PDF

This book dismantles Islam by exposing the imposture of Muhammad. The historical Muhammad is too privileged to be formally evaluated in the fashion a clinical psychologist would like. But given certain of his well-known and highly documented behaviors, it is certain that he had a conflict-ridden psychological dependence on others. He was not capable of introspection. He had shown all the symptoms of his lunacy and his prophetic claim was based on the quicksand of grand delusion. But the irony is that the entire religion of Islam is based on the truth claim of such a man who could easily swing back and forth between the two extremes - reality and fantasy. Like the mythological Narcissus, he actually worshipped his own image - not God. He had created Allah in his own image and attributed to that God the qualities of his own self. He used Islam to pervade Muslim psyche, and possessed their mind. Islam is an extremely defenseless religion and hence vulnerable to collapse. "Defenseless" in the sense, there is not a single atom of truth in it to support. This failed religion, originated from the grand delusion of a malignant Narcissist, is the biggest hoax humanity has ever seen. It is like a house of cards - looks tall, big, mighty and gigantic but the base is very weak. The aim of this book is to diagnose Muhammad by making use of biographical data and through the application of psychological theory and research. This psychobiography is all about the "why" - the question of motives. It uncovers the private motives behind his public acts. This book presents two theses - Muhammad suffered from malignant narcissism, and was also affected by neurotic disorder which caused regular psychiatric delusions.

Compelling case to leave Islam and its mentally-disturbed prophet

By ChrisLA

Using Islam's own sacred texts and history, Sujit Das paints a detailed picture of a self-appointed prophet who concocted a religion to justify his greed, disdain for women who he equated with domestic animals, and his narcissistic paranoia against his many imaginary enemies. So fragile was his religious construct that Muhammad had to continually rewrite the script, introducing the whole concept of abrogation. Not only did the prophet leave behind a half-built institution with no leadership structure, but the surviving Muslims

fought for years to escape from the grip of the cult. So strong is the paranoia that Muslims even wage civil wars against fellow Muslims over the slightest differences in belief and practice, following Muhammad's own paranoiac destruction of the "mosque of dissent" (Surah 9:107) Today's Muslims have absorbed Muhammad's narcissistic lust for power and domination through the sacred works, creating a world inhabited by little Muhammad's driven to carry on his evil mission. Concludes Mr. Das, "A poisonous tree produces poisonous fruits."

It would be hard to imagine that a thinking Muslim could read this comprehensive analysis of the origins and manifestation of Islam without having a strong desire to leave Islam and everything associated with it. This book is not a "anti-Muslim hate book," but rather a well-developed case to strengthen the Muslims' resolve to leave Islam.

Sujit Das Dismantles Islam & Stomps on its Pieces

By Shivaji

Sujit Das has written an amazing work. This book puts the Quran, the life of Muhammad, & various hadiths under a microscope and presents argument after argument (armed with reason, facts, and logic); completely dismantling the legitimacy and prophetic claims of Islam.

Furthermore I have never read a more apt psychological analysis of why Muhammad did all the horrible things he did. In chapter 3, Sujit Das explains how Muhammad's erratic actions & words make sense when attributed to the condition of malignant narcissism.

Although this book is a worthy read, there are grammatical errors on almost every page and this is certainly distracting. Furthermore, this is a very comprehensive work and sometimes a very long read (and that's certainly not an entirely bad thing).

All in all, this is a great work. If one wants to further understand the psychosis of Arabia's most famous prophet, then this book is definitely worth your time.

Very Informative about Muhammad, Allah, and Islam - the WHY

By Panentheist

If you are looking for well researched and referenced material about Muhammad and Islam, this book explains things VERY well at a level that even I could comprehend. Questions that were answered for me as well as many others; Why do Muslims stay with Islam? How can they "believe" much of the crap in the Qu'ran? How was the "sick" Muhammad able to convince his initial followers?.
