Grant Morrison has more disciplined creativity than the rest of us put together - with the possible exception of Jonathan Hickman. Note a constant theme in Morrison's work - the wonderful book Supergods - looks to you to do your part in making the world a much better place. See how the Superman on the cover is looking at you, and extending a welcoming hand? think you have a duty to do something about that? Yes, and yes.

Grant Morrison Being Grand

By Dillon Johnstone

Honey, get the Multiverse: Cosmic Neighborhood Watch crew together because we're having a BBQ.

Look, I know that some people are going to have some difficulty with this series, this comic in particular. It's got a lot of moving pieces (there's 51 earths in this multiverse afterall) and they're all being intangled together. I started out with "Multiversity the Just" it only has one planet highlighted on the side. Then I read Multiversity the Society of Super-Heroes, which has 2. I actually didn't start to read those until Multiversity

the Multiversity came out, but I still saved it for last (it had just come out for you later review readers).

I was a little disappointed with myself because I was like "how could I have been such an idiot to miss work by Morrison?" But I got over it pretty quick. The order that I read it in is what makes the most sense to me, it's like a slow drip from one planet to many planets being combined. But A LOT of stuff in the comics won't make sense to folks, and to that I'm gonna say "duh" they're combining universes and even parodying Marvel Comics in it also. If you're combining dozens of universes into a handful of comics, a lot of it will be confusing, and a lot of it isn't intended to make sense.

I think that this particular issue suffers from being a little choppy. It feels very rushed, where as the other two felt like a smooth ride into their climax. But that doesn't mean that it's not one hell of a fun ride because it's meant to be confusing after all. Imagine being the characters in the comic and being thrown around from one world to another, unsure of the inhabitants and what you're going to run into. Morrison is making you suffer with them. Remember, the comic is communicating with you and you're being sucked into it... Just like every other character who is reading comics, in their comic.

Don't let other reviews on this comic discourage you from reading it. It introduces a VERY important character. Plus, it introduces black Superman. He's my all time favorite Superman because he's practical, he's smart and he's got a kind of grit I haven't found from other Supes. He's not the only one though, a slew of other well known and veritable characters are brought into this "monster mash".

Stick around for the ride. I don't want to give any spoilers because every page is pretty darn awesome. Get this issue.
