**Strunk and White of Music Notation**

By Paul Fredrick

This is one of those books you wish you came across twenty years earlier. I am not a professionally trained musician, but have been playing music for nearly 28 years, now, and reading (but not writing) music for the past 15 years. Just like a semi-literate native language speaker who kind of knows what's right and wrong by intuition, but still makes a lot of grammar and style mistakes when writing, I found that I could distinguish well written music from that poorly written, but couldn't tell you why.

Recently I was faced with learning five or six tunes and had to make charts for them. Enter this book. It's as thorough a grounding that you will get in terms of the grammar of writing music. The philosophy is that written music is a graphical language, with agreed upon grammar, style, and usage. These rules are spelled

out wonderfully in this text, and ample examples of both good and bad practices are shown.

Having used the book as a guide in preparing these recent charts, I have noticed an immediate improvement in my copying skills. Highly recommended to both students and professionals alike.
