Understand how a patient's conditions might affect physical therapy and outcomes so that you can design safe and effective interventions. The only pathology textbook written specifically for physical therapists, *Pathology: Implications for the Physical Therapist, Third Edition*, offers guidelines, precautions, and contraindications for interventions with patients who have musculoskeletal or neuromuscular problems as well as other conditions such as diabetes, heart disease, or pancreatitis. Learn about the cause of these conditions, the pathogenesis, medical diagnosis and treatment, and most importantly, the special implications for the therapist. In addition to addressing specific diseases and conditions, this text emphasizes health promotion and disease prevention strategies and covers issues with implications for physical therapy management, such as injury, inflammation, and healing; the lymphatic system; and biopsychosocial–spiritual impacts on health care. With this practical and evidence-based text, now enhanced with full-color illustrations and the latest research, you'll know what to factor into your clinical decisions to achieve the best outcomes for your patients.

- Incorporates the Medical Model, the Disablement Model, and the ICF Model
- Incorporates Preferred Practice Patterns from the *Guide to Physical Therapist Practice, Second Edition* throughout the text
- Presents key information in at-a-glance format that is organized by body system for easy reference
- Provides the basic science information and the clinical implications of disease within the rehabilitation process, covering common illnesses and diseases, adverse effects of drugs, organ transplantation, laboratory values, and much more
- Focuses on health promotion and disease prevention throughout
- “Special Implications for the Therapist” sections present the most likely practice patterns associated with each disease or disorder and address precautions, contraindications, and considerations specific to PTs.
- Current information on conditions, medical testing and treatment, and practice models keeps you up-to-date on the latest research findings and recent changes in the field.
- Companion Evolve site provides easy access to articles referenced in the text with links to Medline.
- Tables and text boxes throughout the text summarize important information and highlight key points.

- Full color interior design, photos, and illustrations
- Chapter on Behavioral, Social, and Environmental Factors Contributing to Disease and Dysfunction includes clinical models of health, variations in client populations, and lifestyle factors that are important to consider when treating a patient.
- “A Therapist’s Thoughts” offers personal and clinical insights from experienced therapists specializing in cystic fibrosis, lymphedema, and psychological problems.
- Now covers the World Health Organization’s International Classification of Functioning, Disability, and Health (ICF), a model that includes the level of participation in desired activities as a criterion for establishing status and goals
- UPDATED! Evidence-based content with over 6,000 references
- EXPANDED chapter on the lymphatic system features additional sections on lymphatic diseases plus

- exercise guidelines, education, and a home program for patients with a compromised lymphatic system.

I love this book

By David Naputi

I love this book. A lot of Pathology information on pretty much everything you'll see in the clinical setting. There is a lot of relevant info in the implications sections that can help you with your thought processes if you encounter more complex pathologies. It also follows the Guide to PT Practice, which is what all the questions on the board exam and clinical specialty exams are based on. I did dock one star due to it not listing or making small references to some tests or measures used for some cardiopulmonary and neuro pathologies, and also having some heavy repetition in some topics. Overall this is quite a hefty book and is the thickest book on my bookshelf, but it is very useful and has enough info to understand at a professional level mostly any complex patient pathology you may see in any setting.
