Not awful

By Tyrfin

Author needs to do a little more research if he's going to write military sci-Fi. Examples: rank structure oddities and customs/courtesies are out of wack, you can't tourniquet abdominal wounds, gets clock directions confused at times. Nonsensical tactics.

Additionally, EMP is demonstrated to be effective at knocking out Alliance tech, but for some reason the protagonists never think to use it to schwack the zombied ARRs, freeing tons of additional bodies to help in the fight?

Overall much better than most non-mil authors trying to write in this genre.

A very enjoyable and recommended read.

By Amazon Customer

I don't often write reviews, I do read a lot of sci-fi and sci-fantasy and due to the volume, I often try free stuff! Much of what you can find is second rate and doesn't make it past the first chapter, I'm pleased to say this series has so far been very enjoyable and kept me page turning well into the small hours. I'm looking forward to more from M.R Forbes and I am sure I won't be disappointed.

The Universe is a Wheel of Time...

By 9wt

Takes up where Starship Eternal left off. People have outlined the plot: this is a battle against AI. But not a simple battle, but full of complex ideas and interesting characters. Can one man make a difference, with a small support team and enigmatic AIs both helping and hindering? It keeps you guessing and entertained. I look forward to the conclusion.

Try it, if you like SF and galactic wide engagements. Might help if you understand the Buddhist Wheel, too.
