Amazon.com Review

Richard Bachman is really Stephen King, and *The Regulators* is a kind of companion novel to *Desperation*, which was published simultaneously. These books mark the return of the Stephen King of old; the Stephen King of *The Stand* and *Pet Sematary*, where good and evil were at war and blood and gore flowed through the pages. The companion novels center around a new personification of evil that goes by the name of Tak, unearthed by an evil mining company that's destroying the earth in the name of profit. In each, the characters and situations are altered as King plays with questions of identity and form. But the real point here is what's on Tak's mind? Does it want to "Eat pork rinds? . . . Screw some NFL cheerleaders? . . . Rule the earth?"

From Publishers Weekly

Why revive the Bachman byline more than a decade after Stephen King was found lurking behind it? Not for thematic reasons. This devilishly entertaining yarn of occult mayhem married to mordant social commentary is pure King and resembles little the four nonsupernatural (if science-fictional) pre-Thinner Bachmans. The theme is the horror of TV, played out through the terrors visited upon quiet Poplar Street in the postcard-perfect suburban town of Wentworth, Ohio, when a discorporeal psychic vampire settles inside an autistic boy obsessed with TV westerns and kiddie action shows and brings screen images to demented, lethal life. The long opening scene, in which characters and vehicles from the TV show *Motokops 2200* (think *Power Rangers*) sweep down the street, spewing death by firearm, is a paragon of action-horror. The story rarely flags after that, evoking powerful tension and, at times, emotion. The premise owes a big unacknowledged debt to the classic *Twilight Zone* episode "It's a Good Life"; echoes of earlier Kings resound often as well?the psychic boy (*The Shining*), a writer-hero (*Misery*, *The Dark Half*), etc. But King makes hay in this story in which anything can happen, and does, including the warping of space-time and the savage deaths of much of his large cast. The narrative itself warps fantastically, from prose set in classic typeface to handwritten journals to drawings to typewritten playscript and so on. So why the Bachman byline? Probably for fear that yet another new King in 1996 in addition to six volumes of *The Green Mile* and Viking's forthcoming *Desperation* might glut the market. Maybe, maybe not. But one thing is certain: call him Bachman or call him King, the bard of Bangor is going to hit the charts hard and vast with this white-knuckler knockout. King's millions of fans are in for a treat: Two of the author's new novels are being published simultaneously,

one of which bears the name Richard Bachman, a pseudonym King previously scrapped when, in the late 1980s, an enterprising Maine reporter discovered that Bachman and King shared many similarities. Those who have read the cynical but exciting Bachman books (e.g., *Thinner*, 1985) know that King's stories take on a misanthropic edge when he dons his nom de plume, and *The Regulators* is no different. The novel is set in an idyllic Ohio suburb where a group of residents are treated to a day-long horror show courtesy of an autistic child who is serving as host to an alien intelligence. Bachman gleefully kills off his most sympathetic characters in a plot that's reminiscent of an old Western crossed with a Saturday-morning cartoon. Although the action is fierce and Bachman's imagination proves boundless, the hopelessness of his characters' predicament makes it a bleak and tiresome reading experience. Although *Desperation* features many of the same characters as *The Regulators*?some of whom will once again meet grisly ends?as well as the same villain, it is nonetheless everything that *The Regulators* is not: The plot is tight, the action is well orchestrated, and King's running theme of redemption packs a mighty wallop. The novel, named after a small mining town, tells of a group of travelers who encounter a nasty presence along a Nevada freeway. Ultimately, both of these titles will remain on library shelves for nanoseconds at the most, but if you can only afford one, stick with *Desperation*.

TAK is BACK!

By jmh

Once again, evil befalls a select group of innocent people. In this case, it takes place in the suburbs of Wentworth, Ohio. The entity, Tak, who was granted new life from an old abandoned mine in *Desperation* Nevada, is back.

And, when Tak is back, there is hell on earth. So is the reality, displaced and altered to accommodate the visuals of an autistic boy named Seth. In the course of a few hours, Tak strives to act out a western movie and "wipe this town off the map." As Tak plans and begins to act out his strategy, the neighbors on the block of Poplar Street watch in horror as everything around them turns into an old desert mining town, complete with the chinese laundry, log cabins and hitching posts. Then the life size toy vans drive through and unleash their barrage at the stricken neighborhood. Remarkably, oddly constructed animals and signs sprout up and it reminds everyone of a first grader's attempt at drawings come alive.

How to stop it, how to confine Tak? Tak literally feeds off the souls of dead, sucking their life energy and making him stronger. Yet he is trapped in the body of a 7 year old, and can only physically accomplish what the 7 year old can do. In his frustration, he attempts to move on, but finds that Seth, the 7 year old autistic

child has reached deep inside his own malfunctioning brain to change Tak's course forever.
